Art Unit: 1618

Claims 7-16 are presented for examination.

The remarks filed on November 11, 2005 have been received and entered.

Claims 7-16 are again rejected under 35 U.S.C. 103 (a) as being unpatentable over Mazuel et al. ('760), Rozier et al. ('559) and GB Patent application 2007091 for the reasons set forth on pages 2 and 3 of the office action of August 26, 2004 and page 2 of the office action of May 12, 2005. Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive for the reasons discussed in the office action of May 12, 2005. The prior art teaches a composition of dexamethasone that can change to gel upon instillation into the eye. Applicant alleges criticality to specific PH of the claimed invention and a more stable composition based on the specific PH. The allegation is not well taken. The presented data are not commensurate in scope with the claimed language. Furthermore, the PH is not the only variable in the comparative example.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
